PROFESSIONAL SUMMARY

Software Developer and undergraduate student in Systems Analysis and Development, with experience in Full Stack development, microservices, API integration, and LLM-based applications. I work with C#/.NET, Angular, TypeScript, and PostgreSQL. I am interested in Software Engineering, Critical Systems, and Research & Development, seeking to apply computing and software development to build reliable solutions for complex problems.

EXPERIENCE

WaveConcept Software | Software Development Intern

FEB 2025 - PRESENT

- Development and maintenance of an LLM-based conversational agent as a microservice for customer service and delivery order processing, using C#, .NET, Semantic Kernel, and Ollama.
- Integration with the Meta WhatsApp Business API through webhooks, connecting the agent to order services and enabling the processing of information such as address and sales and business data.
- Development of a solution based on Vision Language Models (VLMs) for menu interpretation and structured data generation, automating product registration steps.
- Development and maintenance of Full Stack applications with C#, .NET, Entity Framework, Angular, and TypeScript, including PostgreSQL integration and documentation of structures used in production.

KEY PROJECTS

Kitsune Infrastructure | AWS, Docker, Linux, WireGuard, HAProxy, Nginx, PostgreSQL, PHP, React

<https://github.com/raphaelamonteiro/kitsune-infrastructure>

Individual distributed infrastructure project on AWS, with two EC2 instances connected via WireGuard VPN, using HAProxy for load balancing, Nginx as a reverse proxy, and Docker for service containerization.

AdaTrade | React, Node, NestJS, PowerBI, Python, Colab, Postgres, Prisma, Git

<https://github.com/raphaelamonteiro/adatrade>

Platform for analyzing open data on Brazilian foreign trade, developed as a team. My contribution included implementing time series forecasting models using Prophet to analyze data trends and developing the interface and data analysis with Power BI. The project was later presented at PyDay in São José dos Campos, after an invitation from one of the professors involved (Fernando Masanori).

SKILLS

HARD SKILLS: C#, .NET, TypeScript, Python, Java, Angular, React, Next.js, Node.js, PostgreSQL, MySQL, MongoDB, Linux, Docker, AWS, Git

SOFT SKILLS: Continuous learning; Creativity; Proactivity; Teamwork.

Knowledge and experience with Agile Methodology (Scrum).

EDUCATION

FATEC Prof. Jessen Vidal | Undergraduate Degree in Systems Analysis and Development

JAN 2024 - DEC 2026

ETEC Machado de Assis | Technical Degree in Systems Development

FEB 2022 - JUL 2023

Roque Passarelli / Proz | High School with Technical Certificate in Administration

FEB 2021 - DEC 2023

COURSES, CERTIFICATIONS & COMPLEMENTARY EDUCATION

National Institute for Space Research (INPE) | Participant – WorCAP 2026 Hackathon

Development of a machine learning model capable of predicting average monthly precipitation from climate reanalysis data.

SEP, 2026

iSAQB® – International Software Architecture Qualification Board | Certified Professional for Software Architecture – Foundation Level (CPSA-F)

SEP, 2026

ICPC Foundation | Staff – 2026 ICPC South America Brazil First Phase

AUG, 2026

Aeronautical Institute of Technology (ITA) | CE-235: Embedded and Real-Time Systems Design (Auditing Student)

JUL - DEC, 2026

Aeronautical Institute of Technology (ITA) | CE-245: Information Technology (Auditing Student)

FEB - JUN, 2026

FATEC Prof. Jessen Vidal | Volunteer Staff – XV InterFatecs Programming Marathon

MAY, 2026

Cognitive Class | Spark Fundamentals I

MAR, 2026

Cognitive Class | Big Data 101

MAR, 2026

LANGUAGES

Portuguese: Native

English: Intermediate (B2)
